## RELATED EXPERIENCE

**GreenTrail** | [Link to GitHub](#) | [Link to Deployed Project](#)

- *Full-stack application promoting responsible travel that benefits local communities. Providers can market their services and travelers can find locally vetted recommendations for authentic experiences.*
- Back-end: Created the data structure, db models, controllers, and seeds.
- Front-end: CSS styling
- Successfully improved app performance by refactoring from Handlebars to React.
- Technologies used: Javascript, PostgreSQL, Express, Node, React, Handlebars

**Travel Buddy** | [Link to GitHub](#) | [Link to Deployed Project](#)

- *MERN stack application for groups of travelers to envision and plan a trip together and track all trip-related logistics in real time.*
- Back-end: Wrote models, schema, and seed data.
- Front-end: Created React components, whiteboard page, contact page using MUI.
- Assisted with refactoring from original Javascript into Typescript.
- Technologies used: Javascript, MongoDB, React, Express, Node, MUI

**Dad's Dinner** | [Link to GitHub](#) | [Link to Deployed Project](#)

- *Front-end application that generates recipes based on what the user has in the fridge and provides random dad jokes to entertain the kids.*
- Created project wireframe, designed user stories, wrote all CSS code.
  - JavaScript, CSS, HTML, Web APIs
